Features and Benefits of Exacta Ration

- ❖ Variety of feeding applications
 - Cows or bulls
 - Developing bulls or heifers
 - Calves on wheat pasture or corn stalks as a **complete package**
 - No additional mineral is required
 - Cattle on creep feed
- ❖ Highly digestible fiber
 - Improves forage digestion
 - Improves gut health
 - Achieves leaner gains
 - Increases gains compared to forage alone
- ❖ **NOT A SALT LIMITER**
 - Just enough salt to meet the requirements of the cattle
- ❖ Complete vitamin and trace mineral package

Gluten Pellets

Soybean Hulls

Wheat Midds

Distiller Grains

Supplements with Limiters

Exacta Supplement

Features and Benefits of Exacta Supplements

- ❖ Uses your own feedstuffs
 - Mix on the farm or at your feed dealer
- ❖ Do not have to feed fine ground corn
 - Prevents bloats and acidosis
- ❖ Complete mineral, trace mineral, and vitamin package built in
- ❖ Proven controlled consumption
- ❖ Exacta supplements can be fed with a variety of feeds, including by-products
 - Soybean hulls, gluten pellets, distiller grains, wheat midds can be used
 - No need to rely on high-priced grains
 - Achieve desired performance without getting cattle too fleshy
- ❖ Reduces cost of gain

What the Competition Says

The following performance records were **compiled by Purina Mills, LLC** and compare Purina Mills' *Accuration* and Impact ration to *Exacta Ration* by Great Plains Livestock Consulting, Inc. The trial was **performed by Purina Mills, LLC** at Franz Farms in New Hartford, Missouri.

The cattle on this trial were home raised, non-implanted calves fed on a self-feeder. Cattle were fed in pens of mixed steers and heifers, with 56 head fed Purina Accuration and 55 head fed Exacta Ration

| Performance | Purina AccuRation | Exacta Ration |
|------------------------|-------------------|---------------|
| Days on Feed | 156 | 163 |
| Avg. Daily Gain (lb) | 2.65 | 2.57 |
| Avg. Feed/hd/day(lb) | 21.04 | 20.54 |
| Avg. Feed/hd/day (%BW) | 2.29 | 2.26 |
| Feed:Gain As-Fed (lb) | 7.93 | 7.98 |

| Economics | Purina AccuRation | Exacta Ration |
|-----------------------------|-------------------|---------------|
| Feed Cost of Gain (\$/cwt) | \$50.08 | \$41.78 |
| Total Cost of Gain (\$/cwt) | \$53.85 | \$45.66 |
| Savings | | \$34.32/hd |

Exacta Ration proved an \$8.19/cwt advantage. This difference, considered with the average total gain from the *Exacta Ration*, produced a savings of \$34.32 per head with the Exacta Ration over the Purina program.

What is Exacta Ration

Exacta Ration is a state-of-the-art feed with a proprietary limiter that does not smell like fish or rust steel like a high salt mix does. It has been on the market in the Midwest since 1997, so with a proven track record it only needs customized to fit your desired consumption and rate of gain. ***Exacta Ration* is designed for growing calves from 400 to 1000 lb with a desired rate of gain from 0.5 to 3.0 lb per head per day or breeding stock that needs additional frame and/or condition.**

Good quality forage should be available free choice from hay or pasture. With correct usage, founder (acidosis) is eliminated due to the limited amount of starch consumed in a single feeding and throughout the day.

Exacta Ration reduces your labor, management needs and cost of gain, freeing up time and resources for other important jobs. *Exacta Ration* is an economical self-limited feed that is adaptable to many feeding scenarios. *Exacta* is formulated to provide energy and protein along with a complete vitamin and mineral package to keep cattle healthy and can be customized to help you meet your performance goals.

What Producers Say

"I have been using Exacta rations for 4 years now and have gotten along great with them. This system has been like a hired hand for me. The cattle eat smaller amounts all day long. The biggest advantage is that it has enabled me to use the commodities available at varying rates according to price while still keeping the cattle at peak performance. The consumption has been right on target with my desired intake at a very low inclusion rate thanks to Great Plains Livestock Consulting, Inc."

Mark Franz
New Hartford, MO

"We have been very satisfied with recommendations from Great Plains Livestock Consulting, Inc. to use the Exacta grain mix program for our cattle. The cattle do exceptionally well on this program compared to others we have tried. It was a pleasure working with Great Plains Livestock Consulting."

Kirby & Jane Guthrie
New Canton, IL
