Feeding Directions

Feed at a rate of 0.5 lb/head/day to provide 250 mg/head/day of Rumensin. Feed at 2 to 3% of the diet on a dry basis, to supply 20 to 30 g/ton of Rumensin in the final feed. Provide abundant, fresh supply of water. Provide a separate source of salt and mineral, free choice. For further directions consult your supplier.

FEATURES

- **High level of calcium**
- **Loose mineral**
- **Added thiamin**
- **Low inclusion rate**

BENEFITS

- **Balances the high phosphorus content to prevent water bellies**
- **Supplies critical ingredients at the lowest inclusion rate**
- **Aides in the prevention of polio and brainers**
- **Less supplement costs per head per day**
